---

## PROFILE

Extremely experienced Emergency Medical Professional in both the military and civilian work place. I've been involved in numerous medical roles ranging from medical centre practice management, to working alone on military operations providing remote medical support

Instructional experience providing phase 1 (basic) & phase 2 (medical) training to recruits joining the Royal Army Medical Corps (RAMC) and helped the continued development of the common Core medical training syllabus.

Currently employed as a Tier 2 PSD team medic for the last 4 years working in the oil and gas industry, gaining valuable experience within this hostile and dangerous sector for clients SHELL and Exxon Mobil in Iraq.

## EXPERIENCE

TIER 2 OFFSHORE MEDIC- PSD, **OLIVE GROUP & G4S**, IRAQ  
2011 - PRESENT

### **G4S Roles - Present role**

- Ensure all medical equipment is maintained in an operational condition.
- Maintain all equipment and medicines in a sterile state before 'use by date'.
- Provide immediate emergency medical support (Trauma or Primary Care) to personnel.
- Liaise with specialist medical departments such as air support and evacuation teams.
- Maintain contemporary knowledge of clinical guidelines and treatment advancements.
- Demonstrate Continuous Professional Development of medical skills and treatment techniques.
- Take on the full responsibilities of Team Leader when on leave or if deemed necessary.
- Report all incidents according to the Host Nation's rules and regulations, G4S policy and SOPs.

**Olive Role Responsibilities:** As above &

Was selected by Exxon Mobil and the Project Manager to become the senior Medic on contract responsible for carrying out the training and management of the other Tier 2 medics.

Personally wrote the Mass casualty plan for the West Qurna 2 contract for Exxon Mobil (Fluor) and Olive Group, and planned the emergency medical treatment facility located at DS6.

Was the point of contact for Prometheus Medical to manage the weekly Medical returns and CV vetting for potential Tier 2 medic's.

EMERGENCY MEDICAL TECHNICIAN, AMVALE MEDICAL, – 2007 - 2011

Provided emergency care to patients providing inter hospital transfer to the specialist cardiac unit castle-hill in hull. And provided Blue light Emergency back up support to EMAS ambulance service.

- Collection and Transportation of Cardiac patients between cardiology units.
- Manage and provide Advanced Life support whilst in transit
- To attend weekly training with senior cardiologist
- To act as First Person On Scene if required by Ambulance Control.

COMBAT MEDICAL TECHNICIAN, BRITISH ARMY. – 1992 - 2007

During an extensive 15 year military service I worked within the Royal Army Medical Corps providing medical care to the armed services in many contrasting environments ranging from the Practice Management of a medical Centre in the jungles of Belize to the desert of the Middle East. Reaching the senior rank of Staff Sergeant I excelled against my peers completing many instructional courses resulting in been selected to be a phase 1 basic training instructor and also a phase 2 medical instructor.
