

BHD specializes in Construction, logistics, project management, Engineering services, and quality control. BHD has over 7 years of continuous experience serving the USG and the GoI with 100% success.

BHD provides a full spectrum of management planning assistance, from long term strategic plans to operational action plans and implementing procedures. BHD professionals consult with client managers and technical staff, providing advice and assistance in analyzing management effectiveness through organizational assessments to identify process and productivity improvements. Organizational assessments are the basis for the development of performance measures and indicators that become performance standards against which program audits and evaluations continuously monitor process and productivity improvement and the cost effectiveness of operations.
